Education • Advocacy • Networking

PCCA

Power & Communication Contractors Association

Learn why your
 company should join today

Who Is PCCA?

Since 1945, the Power & Communication Contractors Association has represented the interests of contractors, manufacturers, and suppliers in the various sectors of power and communication construction throughout North America. PCCA provides advocacy on issues that impact your bottom line, a practical workforce-development program, industry-specific education, and unbeatable networking opportunities with people who can open doors in power and communication construction.

PCCA-member contractors build electric power facilities, including transmission & distribution lines and substations, and broadband systems throughout North America. Other business activities include intelligent traffic systems, local area & premise wiring, security, renewable energy, water & sewer utilities, and gas & oil pipelines.

PCCA is supported in large part by its associate membership, which is made up of manufacturers and suppliers in the industry who provide the highest quality materials and services. Associate members are equal partners in PCCA, working alongside contractors and having representation on the Board of Directors.

Why Join PCCA?

Advocacy on Issues that Impact Your Bottom Line

PCCA meets regularly and works closely with federal agencies and other groups that affect our members' work. These groups attend PCCA meetings to give updates and answer your questions.

- Broadband funding, universal service, 100/100 Mbps
- Electric power funding, undergrounding, grid hardening
- Improving damage prevention system nationwide, Annual PCCA/CGA Excavation Safety Summit

*"ElectriCom has been an active member since the 1960s, and the key is **active**. We attend conventions and take advantage of networking opportunities with vendors as well as with fellow contractors. We learn of each other's problem areas and work as a team to benefit all. PCCA is an industry influencer, but only because of the active participation of our contractor members and our vendor partners."*

— Bob Breeden, ElectriCom

- Labor issues: fighting mandated project labor agreements, PRO Act, prevailing wage, over-reaching OSHA regulations
- DOT trucking issues, hours-of-service regs
- Permitting issues, railroad crossings

A Practical Workforce-Development Program

- Works with technical colleges to develop utility technician programs (Monroe County Community College, Northwood Technical College, Somerset Community College, State Technical College of Missouri, and Terra State Community College)
- Maintains a DOL-supported apprenticeship program
- Awards scholarships to dependents of PCCA members and their employees and to students at PCCA-affiliated schools

Industry-Specific Education

- PCCA Leadership Development Program: Ongoing learning experience delivered each year at the PCCA Convention with action planning and follow-up to reinforce concepts and encourage practical implementation of skills back on the job
- PCCA Industry Roundtable: fast-moving and frank discussion at every PCCA meeting that covers government affairs, education and workforce development, and economic forecasting
- Informative and inspirational educational sessions and speakers at all PCCA meetings
- PCCA Journal & www.pccaweb.org
- Social media: LinkedIn, Twitter, Facebook, Instagram
- Annual Associates Breakfast where contractors learn about industry products & services

Unbeatable Networking Opportunities

- Work alongside industry leaders on issues that impact your business and bottom line

"The people are what make PCCA a great organization. Many member companies have long family histories in their respective businesses and deep roots in their industries. Opportunities to network and share ideas with such a great collection of folks are not found every day, and that is what really makes this association special."

— Nick Anderson, Anderson Underground

- Attend PCCA Conventions, Mid-Year Meetings, and DC Fly-ins where everybody hangs out with everybody and where career-long relationships are forged
- Socialize with colleagues from across North America, meet their families, play golf, and enjoy relaxed, fun times
- Become part of the PCCA community during meetings and throughout the year at www.pccaweb.org and on social media
- Annual Membership Directory, online and print editions, with valuable contact information

Attend the 2022 PCCA Convention

February 25 - March 2, 2022 • Sheraton Grand at Wild Horse Pass • Phoenix, AZ

For more information, contact
Stacy Bowdring or James Wagner at
(800) 542-PCCA or go to www.pccaweb.org

"Leadership development is important to our company as we grow, and it helps develop each individual as they obtain more responsibility. PCCA facilitators do an excellent job! They know how to keep people engaged and get the point across."

— Rob Pribyl, MP Nexlevel
